

Overview

Weapons typically fall into one of four categories: Two-handed, one-handed, thrown, and ranged. Armor is simplified into five categories: Padded, Light, Medium, Heavy and Super Heavy. Many variations of a 1 handed sword exist, such as a falchion, a scimitar, longsword and katana, but here the base stats for any of these weapons is simplified to their category. It is expected for players and GMs to describe weapons, while the GMs may use alternative stats to represent higher quality weapons, i.e. "a longsword that deals 1d10+2, Pen 3, and has the balanced trait" in place of the standard One-Handed sword stats.

Armor Types

Type	Speed Reduction	STR, AGI, CON Test Penalty	Armor Points [AP]
Padded	0	0	1
Light	0	0	2
